

Use the fraction bars to help solve the calculations by clicking in them to shade the parts. Type the answers in the empty boxes.

1.  $\frac{1}{5} + \frac{3}{5} =$

2.  $\frac{1}{3} + \frac{1}{3} =$

3.  $\frac{2}{8} + \frac{4}{8} =$

4.  $\frac{4}{7} + \frac{2}{7} =$

5.  $\frac{2}{4} + \frac{1}{4} =$

6.  $\frac{2}{6} + \frac{3}{6} =$

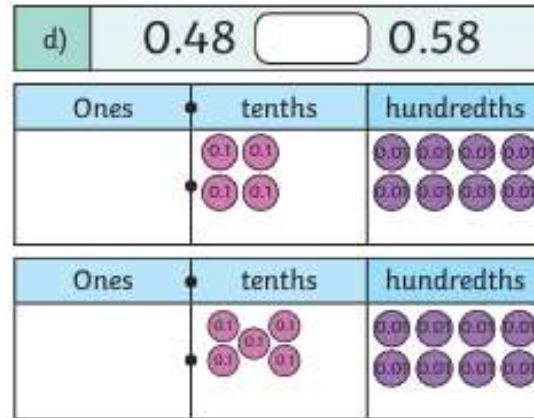

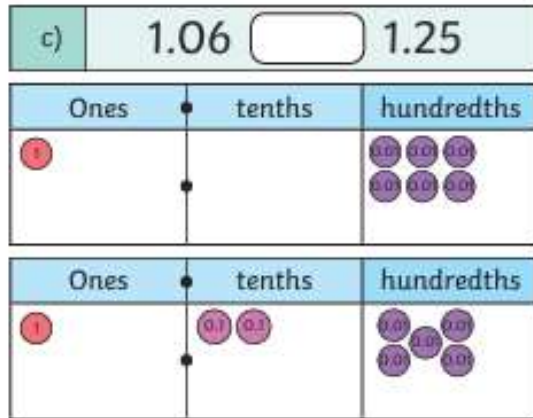

7.  $\frac{3}{9} + \frac{4}{9} =$

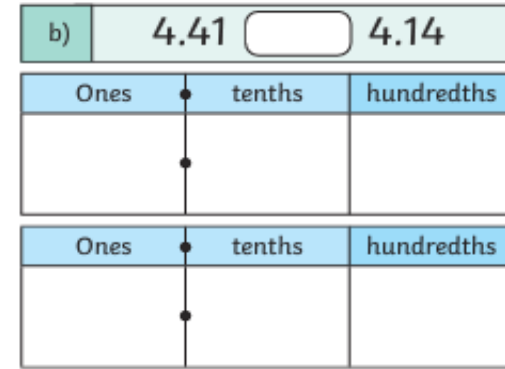

## Y3 Task

Just  
write  
the  
fraction  
in your  
book.  
**You do**  
**not**  
**need**  
**to print**  
**this**  
**page.**

1) Compare the numbers below. Insert either < or > to make the statements correct.

2) Draw counters on the place value charts to compare the decimal numbers. Insert < or > to make the statements correct.

3) Complete the statements using each of the numbers below. You can only use each number once.

$4.48$	$0.1$	$3.9$	$2.4$
--------	-------	-------	-------

$0.3 > \square$        $2.2 < \square$   
 $3.8 < \square$        $4.45 < \square$

Y4 Task  
-  
Just write the statements in your book. You do not need to print out.
